Courses Offered

AERIAL APPARATUS FAMILIARIZATION FF165

This 15-hour course is designed to provide generic training on aerial apparatus operations and their tactical use.

INTRODUCTION TO FIRE DEPARTMENT PUMPERS FF111

This 15-hour course is designed to familiarize the student with the basic operation of fire department pumper apparatus. Course subject areas include; types of pumps, pump operation, pump accessories, daily maintenance, and simplified fire ground hydraulics calculations. Classroom activities and practical application is included as part of the course.

PUMPER HYDRAULICS FF112

This 15-hour course is designed to familiarize the student with fire service hydraulic calculations for use in the operation of the fire department pumper. The course includes theory of fire service hydraulics, hydraulic formulas and calculations, and practical work exercises.

PUMP MAINTENANCE FA105

This 15-hour course is designed to provide the student hands-on practical training in the repair and maintenance of fire pumps and pump accessory equipment. Students will work in groups on actual in-service fire apparatus to repair, test and return fire service pumper to service.

**For registration information, contact the TFACA
at 1.800.747.8868 or 931.294.4111.**
